#SPIDERROPE

ARGIOPE EVO 12.1

It's an American-style climbing rope (significant ratio of cover, 16 strands).

CLIMBING ROPE

DESCRIPTION

The ARGIOPE EVO now also comes in 12.1 mm. It's a 16-strand rope in 100% polyester, with a diameter that doesn't change over time -no swelling. The thick cover provides a great resistance to abrasion and therefore a long lifespan.

And just as for the rest of the range, the rope has no cover-to-core slippage: both ends can be spliced.

The colours of the cover are very bright so that it is very easy to spot in a tree. As with the other ropes of the range, the originality is in the cover and the mix of colours.

The ARGIOPE EVO 12.1 MM Orange comes with one or two splices, and in the following standard lengths: 20 m, 25 m, 30 m, 35 m, 40 m, 45 m, 50 m, and 60 m. You need another length? Our splicers can splice custom lengths, just contact your distributor!

TECHNICAL INFORMATION

Standard	EN 1891 Type A
Diameter	12.1 mm - 16 strands
Colour	Moiré-effect orange, white and red
Material	100 % polyester
Weight	106 g/m
MBS	32.6 kN
Cover-to-core slippage	0 %, no cover-to-core slippage
Elongation	2.4%
Knotability	0,6
