DATASHEET

XARRIER TOP X

The detachable chest harness with carabiner, together with the XARRIER waist harness, forms a complete harness (EN 361) with five attachment points. It is specially designed for rescue operations and rope workers who want to combine comfort and lightness.

Installation is quick and intuitive using the front connector. The sternal attachment point made of webbing material allows easy attachment even under load, with minimal weight and volume. Three self-locking buckles ensure precise and speedy adjustment, while the crossed rear straps ensure a perfect fit.

The harness is equipped with a hot-forged triplex connecting element that offers FIX PRO anti-twist protection.

Caution! The device may only be used in combination with the XARRIER waist belt.

FEATURES
