

Twin-sheave pulley, designed specifically for use in adventure parks.

Main features:

- ergonomic and compact design that make it easy to hold;
- easy to place on and take off the wire, thanks to the large opening catch that can be operated with one hand;
- upper-side protection in polyamide equipped with supports that allow for the positioning of progression carabiners, so avoiding their wearing due to wire-rubbing;
- sheaves equipped with ball bearings, which provide smooth sliding on wire and long working life;
- it can be connected to a webbing lanyard (e.g. [ADV PARK I PLUS](#)) via a girth hitch or to a rope lanyard (e.g. [ADV PARK I](#)) via a quick link;
- it can be stored in its [FOX BAG](#) pouch, which can be attached to any harness.
