

Legacy Saw Line

High carbon stainless steel blade | Increased durability
Full tang construction | Reduced vibration & superior grip

FEATURES & BENEFITS

- Blades constructed from Japanese SK5 high carbon steel for extra sharp teeth and maximum blade durability
- Tri-edge sharpened teeth allow smooth and clean pull cutting stroke
- High frequency impulse hardened teeth increase durability of saw's cutting edge, stay sharp about three times longer than non-hardened teeth
- Rust resistant hard chromed finish produces an exceedingly hard, durable surface
- Full tang construction improves balance and blade rigidity
- Rubber molded elastomer handles inserted over ABS plastic chassis reduce vibration and offer superior grip when hands are wet or cold and when wearing gloves
- Impact resistant molded plastic scabbard allows saw storage on saddle or leg (velcro straps sold separately)
- Cut resistant hard plastic roller at entry point protects teeth and scabbard from inadvertent wear
