

TU 110

Port-a-wrap lowering device

Port-a-wrap - TU 110 - a device designed for arborists. Used mainly for sectional tree felling. Used for controlled lowering of material. By correctly weaving the cable through the device, branches or parts (sections) of the trunk can be safely lowered to the ground. Maximum tree diameter for the AX 500 cargo lashing is 1,2 m

Comes with AX 500 cargo lashing and bag.

PARAMETERS

Weight	11.7 kg
Dimensions	335 x 300 x 250 mm
WLL working load limit	10 kN
MBS minimum breaking strength	50 kN

Permissible working rope diameter $\varnothing$	10-14 mm
---	----------

MATERIAL

Construction	galvanized steel
