Net weight: 7.29 kg

Gross weight: 7.30 kg

DATASHEET

ULTRAROLL STRETCHER

The ultraROLLSTRETCHER is an innovative roll-up carrying system that provides optimal support in difficult areas of operation such as confined spaces, shafts and mountain rescues. Its tubular shape ensures high stability, while longitudinal and transverse stabilizing elements protect the patient. The roll stretcher is lightweight and compact, facilitating transport to the scene and enabling rapid assembly on site. In addition, it is approved for use on certain Bundeswehr helicopters. Included are a waterproof backpack carrying bag, carrying handles, restraint straps with COBRA buckles, a retractable harness and adjustable foot section fixation straps. With the ultraROLLSTRETCHER, rescue operations can be performed efficiently and safely.

FEATURES
