ARBO RING

The glide ring for ARBO rope systems and fall arrest harnesses is designed for professional users in height safety and arboriculture who demand safety, efficiency, and durable equipment. Its robust construction combined with low-friction guidance ensures smooth movement and supports controlled operation in demanding work-at-height scenarios.

In daily use, the glide ring enhances mobility and reduces resistance during repositioning. This improves workflow efficiency and increases comfort, especially during extended operations in tree climbing, rope access, and work positioning applications.

Thanks to its versatile attachment options, the glide ring is compatible with descenders, positioning lanyards, and other climbing equipment. The durable design ensures long-lasting performance and seamless integration into existing ARBO rope systems and fall arrest harnesses.

The result is a robust and versatile glide ring for professional height safety and arborist applications, combining safety, efficiency, and smooth, controlled movement.

FEATURES

Colour:	Anthracite
Min. temperature:	-35 °C
Max. temperature:	60 °C

MATERIAL

Material:	Aluminium
