DATASHEET

ARBO ROPE

GENERAL

Art.Nr:	ACS-0965-120	Net weight:	0.09 kg
GTIN:	8053841308981	Gross weight:	0.19 kg
Customs tariff number:	56075011		

DATASHEET

ARBO ROPE

The rope bridge is designed for professional tree climbers and height safety users who require maximum safety, durability, and flexible application options. Its robust construction and availability in multiple lengths allow precise adaptation to different working styles and individual requirements. It provides a reliable connection for safe and controlled operation in demanding rope access and arborist scenarios.

At its core, the rope bridge supports safe and efficient work positioning during daily tree care and rope climbing operations. High-contrast end stitching improves visual inspection before and during use, enhancing safety and control in the field. An integrated safety spacing for knots ensures clean and secure knot configuration, maximizing reliability under load.

Thanks to the range of available lengths, the rope bridge can be tailored to individual needs, making it suitable for precise positioning as well as dynamic movement in the canopy. The well-engineered design simplifies inspection, improves handling, and ensures long-lasting performance even under intensive use.

The result is a durable and versatile rope bridge for professional arborist and rope access applications, combining safety, flexibility, and easy inspection in one reliable system.

FEATURES

Colour:	Black
Min. temperature:	-35 °C
Max. temperature:	60 °C

MATERIAL

Material:	Polyamide, Polyester
