

ST 012

Hitching device

EN 795/B, CEN/TS 16415

Anchor point ST012 is a type B anchor device complying with EN 795 and is used to protect two people working at the same time. The ST012 anchor point may only be used as a personal protective device to protect a worker from falling and may not be used for lifting loads. The device is made of steel. The strength of this point is min. **13 kN**. The device comes in two size versions giving a spacing range of **50-380 mm** depending on the main bushing used.

The ST012 attachment point is designed for installation on steel and aluminum profiles capable of supporting loads **>13 kN** at the installation site of the device.

PARAMETERS

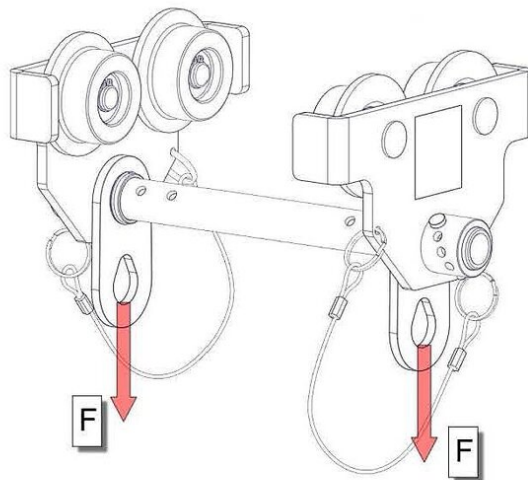

Material	steel
Finishing	hot-dip galvanizing, powdercoat
Static strength	13 kN
Bore diameter of the catch point Ø	24 mm
Spacing min.	50 mm
Spacing max.	380 mm
Max. number of users	2

Color	orange
Waga urządzenia z osią krótką	4925 g
Waga urządzenia z osią długą	5243 g
Wymiary urządzenia z osią krótką	310 x 200 x 140 mm
Wymiary urządzenia z osią długą	500 x 200 x 140 mm
