

Ultra-light, seamless cord loop for use on multi-pitch routes and mountaineering.

Main features:

- thanks to the innovative weaving process, the sling has no stitching nor joining. In addition to reducing the presence of potential weak points, this characteristic makes the sling much easier to handle;
- constructed with core in Dyneema and sheath in polyamide/polyester, for superior strength, durability and resistance to UV radiation;
- the absence of stitching makes the sling easier to fit in tunnels and reduces the overall bulk while setting up a belay station;
- extremely lightweight thanks to the small diameter (6 mm) and a weight of only 0.47 g/cm;
- available in 60, 80 and 120 cm long versions.

 Light Blue (L-0615-0,6)

 Red (L-0615-0,8)

 Yellow (L-0615-1,2)

TECHNICAL FEATURES

Breaking load 22
kN

Diameter Ø 6 mm

STANDARD AND ADDITIONAL INFORMATION

EN 354:2010

EN 566:2017

EN 795-B:2012

CE 0123

Made in Germany
