

## ATOM™ CE QUICK HARNESS

Available exclusively in Europe through CMC's authorized [European Dealers](#). Please contact your European Dealer for details.

The ATOM is our most comfortable and fully-featured harness, incorporating years of feedback from industry experts. The final product is a true workhorse engineered for outstanding safety, mobility, and workflow efficiency. Built for technicians who demand the best in rope access, technical rescue, and challenging work-at-height pursuits, the ATOM maximizes performance and redefines how a harness should feel. ATOM CE models are manufactured in Europe to our exacting standards and processes. They are certified to EN standards and readily available for our European customers.

The ATOM CE QUICK is configured with aluminum quick connect buckles at the legs and left shoulder for easy donning and secure adjustment. The large aluminum D ring attachment points are lightweight, durable, and sized to fit multiple connectors. Dual density foam padding with rolled edges optimize load distribution and integrated shoulder pads alleviate pressure points. Supple polyester web and Y-back construction ensure the ATOM maintains its fit to the body for all-day comfort. Versatile, low-profile components enhance gear stowage including molded gear loops, tool loops, accessory points, lanyard parking loops, and workseat attachment points. A chest ascender can be easily integrated using CMC's ATOM Chest Ascender Kit. Designed for comfort from the ground up, the ATOM CE QUICK molds to the body and moves with you, providing lasting support for long days of technical rope work.

### ATOM CE QUICK Features:

- 3x quick connect buckles allow easy donning and efficient adjustment.
- Aluminum D-ring attachment points accommodate multiple connectors.
- Aluminum side D-rings stow away until needed for work positioning.
- Molded gear loops feature a cold resistant, polypropylene core to maintain shape.
- Braided tool loops on legs and waist provide streamlined gear organization.
- Workseat attachment points at the waist compatible with CMC [Skysaddle™](#) or similar.
- Lanyard parking loops with labels, flexible red braided sheath, and tear-away velcro.
- Multiple accessory attachment points allow stowing and organizing hardware & tools.

- Compatible with CMC's **ATOM Chest Ascender Kit** to add or swap out ascenders.
- Low-Profile, ergonomic design that stays out of your way and moves with you.
- Dual density foam padding with rolled edges provides optimal load distribution.
- Y-back construction and bridged front lift improve comfort & minimize pressure points.
- Polyester web is supple, water repellent, UV resistant, and holds its fit when adjusted.
- CE marked and certified to EN standards, only available in Europe.
