SIZE TABLES

How do I measure myself?

Choosing the correct size starts with measuring your body properly. For the best result, use a soft measuring tape and take your measurements over light, close-fitting clothing. Make sure the tape follows the body without being pulled tight. Having someone help you can make measuring easier and more accurate.

A = Waist - Measure around your natural waistline, just above the hips.
B = Chest - Measure around the fullest part of your chest.
D = Inside leg length - Measure from the crotch down to the floor, along the inside of the leg.
