PRODUCT OVERVIEW

The Chipmunk FLEX Tether is now available as part of our CE PPE Regulation Kits!

The Chipmunk FLEX measures 22cm (9"), which is ~8cm (3") shorter than the original Squirrel FLEX Tether. The short Chipmunk tether allows users to reduce the overall height of their SRT climbing system. A compact climbing system allows climbers more reach space above the system, therefore enabling longer arm strides and greater efficiency during descent.

To maintain CE compliance, the APEX Wrench and Chipmunk FLEX Tether PPE Regs kit must be used in its entirety, teamed with an ISC Teufelberger ø10mm, 60cm Ocean Polyester Hitch Cord (tied in a Knut hitch configuration), and used with Teufelberger ø11.7mm Xstatic Rope.

KIT OPTIONS

| Part Code | Kits | | | Spare Parts | |
|--|----------------------------|--|--|-----------------------------|------------------------------|
