SKY ROLL

The SKY ROLL is a highly functional and intelligent solution for easily unwinding large cable drums on the roof surface. This device has been specially developed for the efficient handling of stainless steel cables (SEKURANT VARIO LINE / SKYLINE) and other cable types. Thanks to its lightweight and robust design, it enables easy one-man operation, saving both time and effort. The adjustable castors make it suitable for a wide range of cable reel sizes, while the lightweight construction of just 5.96 kg makes it easy to transport and handle.

Product details:

- **Adaptability:** Adjustable castors enable use for different cable drum sizes with a maximum width of 540 mm and a diameter of up to 600 mm.
- **Lightweight construction:** Weighing just 5.96 kg, the SKY ROLL is easy to transport and handle without compromising on its load capacity of up to 150 kg.
- **Material and design:** Made of galvanized steel for durability and stability. The dimensions are 600 x 100 x 400 mm, which enables compact storage. Non-slip rubber feet provide additional safety and stability on the construction pedestal.

FEATURES

Application areas:	Flat roof construction
Colour:	Silver

MATERIAL

Material:	Steel
