DATASHEET

KIT PLATFORM 1

The SKYLOTEC KIT PLATFORM 1 is a compact, all-in-one kit for working safely on aerial work platforms. It was developed as a simple basic kit for users who need a readily available, well-organized, and coordinated safety solution when working at heights.

The kit combines the extremely lightweight and quick-to-don IGNITE ION safety harness with the compact PEANUT I fall arrest device and a practical ROPE BAG for storage. The KIT PLATFORM 1 thus offers a clear SKYLOTEC system solution for safe work on aerial work platforms.

Thanks to its streamlined, practical configuration, the equipment remains compact, portable, and quickly accessible when needed. The IGNITE ION is available in various sizes; this version is listed in sizes M-XXL. Proven SKYLOTEC quality and the perfectly coordinated combination of harness, fall arrest device, and storage bag make the KIT PLATFORM 1 a reliable solution for professional use on aerial work platforms.

Your benefits at a glance

- Compact complete set for aerial work platforms

The KIT PLATFORM 1 contains the essential components for working safely on aerial work platforms. This provides users with a compact, coordinated equipment solution that is quickly ready for use when needed.

- With the lightweight IGNITE ION fall arrest harness

The included IGNITE ION is an extremely lightweight and quick-to-don fall arrest harness. This makes it easy to use during daily work and simplifies preparation before working on the aerial work platform.

DATASHEET

KIT PLATFORM 1

- Compact PEANUT I fall arrest device

The PEANUT I fall arrest device, together with the IGNITE ION, forms a coordinated unit. This creates a practical safety solution for working at heights.

- Quick to set up and easy to store

The harness and fall arrest device can be stored directly in the ROPE BAG. This keeps the equipment organized, portable, and quickly available for the next job.

- Coordinated SKYLOTEC system solution

The set combines a safety harness, fall arrest device, and storage bag into a streamlined equipment package. This makes it ideal for companies looking for a straightforward safety solution for aerial work platforms.

Components of the set

- IGNITE ION

The IGNITE ION safety harness is lightweight and quick to put on. It serves as the central harness component of the set for safe work on aerial work platforms.

- PEANUT I

The PEANUT I is the fall arrest device included in the set. Combined with the IGNITE ION, it forms a compact unit for working at heights.

- ROPE BAG

The ROPE BAG provides convenient storage for the harness and fall arrest device. This keeps the equipment organized and ready for quick use.
